Reference Number: LA.PP.023 Effective Date: 08/2020 Date of Last Revision: 08/2024

Coding Implications Revision Log

## <u>See Important Reminder at the end of this policy for important regulatory and legal</u> <u>information.</u>

#### **Policy Overview**

Hospitals may receive reimbursement for visit codes (evaluation and management services) in addition to a laboratory test, but only when the hospital provides a room for an evaluation and management service by a professional. If a significant and separately identifiable evaluation and management service is provided to the patient in addition to the lab work, modifier -25 should be appended.

## Application

This policy applies to outpatient hospital claims.

#### Reimbursement

#### Claims Reimbursement Edit

Louisiana Healthcare Connections code editing software contains a comprehensive set of rules addressing coding inaccuracies such as unbundling, fragmentation, up-coding, duplication, invalid codes, and mutually exclusive procedures

#### Rationale for Edit

A hospital should not bill a visit code for the use of an exam room for a registered outpatient, if the patient was not seen by a provider. Billing a visit code in addition to the laboratory visit is inappropriate when the only other service performed was the collection of a specimen. Like all other procedures, room charges are included in the reimbursement for the procedure.

Modifier -25 should only be used to indicate that a "significant, separately identifiable evaluation and management service (was provided) by the same physician or Other Qualified Health Care Professional on the same day of the procedure or other service."

To avoid incorrect denials, providers should assign all applicable diagnosis codes that support the E/M services reported.

Payments to providers are subject to post payment review and recovery of overpayments.

## **Documentation Requirements**

Documentation from the physician or other qualified health care professional should indicate that an evaluation and management service was provided. The key components of an E/M service (history, examination and medical decision making) must be documented.
